Other Community Activities

LEON CLARKE

Joint GCAM Community Modeling Meeting and GTSP Technical Workshop
Joint Global Change Research Institute
College Park, Maryland, USA

September 18-20, 2012
How Much Model Intercomparison is Enough

- There are many, many model intercomparison projects underway right now.
- They are funded both from private and public funding.
- They are largely U.S. and E.U. studies.
  - The E.U number of studies has expanded dramatically the last several years.
- Many of the studies are rushing to get papers in in January 2013 in order to meet the deadline for WGIII.
- There are enough studies to make participation in all the current studies very difficult.
Current Model Intercomparison Projects

- **LAMP**: Latin America Modeling Project
- **AgMIP**: Agricultural Model Intercomparison Project
- **EMF 24**: Technology and U.S. Climate Policy
- **EMF 27**: Technology and International Climate Policy
- **EMF 28**: Technology and E.U. Climate Policy
- **EMF 26**: Changing the Game? Emissions and Market Implications of New Natural Gas Supplies
- **MUG**: Modeling Uncertainty Group
- **LIMiTS**: Low Climate Impact Scenarios and the Implications of Required Tight Emission Control Strategies
- **AMPERE**: Assessment of Mitigation Pathways and Evaluation of the Robustness of Mitigation Cost Estimates
- **ADVAnCe**: Advanced Model Development and Validation for Improved Analysis of Costs and Impacts of Mitigation Policies
- **RoSE**: Roadmaps towards Sustainable Energy Futures
- **TEaM**: Technology Elicitations and Modeling Project
