

## Letter of Support for IPCC WG III AR5 Chapter 6 Call For Scenario Analysis

### To whom it may concern

The assessment of scenarios plays a key role in the IPCC WG III 5th Assessment Report (AR5)<sup>1</sup> to be published in 2014. In order to ensure a high quality AR5, to fully explore the space of possible solutions, and to establish the conditions needed to draw robust conclusions, it is crucial to assess a wide range of transformation pathway scenarios from the literature. For this reason we fully support the initiative of the Lead Authors and Coordination Lead Authors of WG III AR5 Chapter 6 (“Transformation Pathways”) to call for the submission of long-term, transformation pathway scenarios from energy-economic and integrated assessment models.

Sincerely,

Ottmar Edenhofer  
Co-Chair IPCC WGIII

Ramón Pichs-Madruga  
Co-Chair IPCC WG III

Youba Sokona  
Co-Chair IPCC WG III
